

AI Workflow Audit

Student: Sai Surya
Program: B.Tech CSE

Recurring Tasks

Task	Classification	Rationale
Solve DSA problems	Just Me	Independent problem-solving is essential for interviews.
Learn MERN/Java	Collaborate with AI	AI explains concepts while I practice.
Debug React/Node apps	Collaborate with AI	AI suggests fixes; I verify them.
Build personal projects	Collaborate with AI	AI helps with architecture and reviews.
Write README/docs	Delegate to AI with Review	AI drafts; I verify accuracy.
Improve resume	Delegate to AI with Review	AI improves wording and ATS keywords.
Draft job emails	Delegate to AI with Review	AI drafts; I personalize.
Research technologies	Collaborate with AI	AI summarizes; I validate.
Plan weekly study	Fully Automate	AI generates balanced study plans.
Generate Git commits	Fully Automate	Routine repetitive writing.
Review code	Delegate to AI with Review	AI spots issues before submission.
Career decisions	Just Me	Final decisions depend on my goals.

Claude Project

Project Name: AI Software Engineering Assistant
Custom Instructions: Help me learn software engineering, MERN stack, Java, DSA, and write production-ready code. Prefer concise explanations, best practices, and compare alternatives when appropriate.

Three Target Tasks

Task	Success Definition
Debug Full-Stack Applications	Bug fixed in under 30 minutes and root cause understood.
Write Technical Documentation	README is complete with less than 10 minutes of edits.
Learn New Concepts	Able to implement a working example and explain it independently.
